The library’s Strategic Plan for 2016-2020 strives to meet the challenge of providing ever-improving services during financially constrained times.

With the reality of reduced revenues and increasing costs ever in mind, our goals aim to deliver the most meaningful resources and opportunities possible to our community.

The library will require a renewal of its operating millage in 2018 in order to continue its mission.

Establishing connections, empowering imaginations, enriching lives.
Goal #1 - Establishing Connections

- We will continue improving our technology offerings to provide up-to-date services. Such improvements may include:
  - charging stations
  - 3D printing
  - wireless printing
  - adding a youth computer area with touchscreens & internet/MS Office access
- We will look for ways to continue increasing digital resources available for checkout and download.

Goal #2 - Empowering Imaginations

- We will work to maintain diverse collections of fiction and non-fiction materials for youth and adults, in multiple formats, to inspire and entertain.
- We will look for ways to expand our collections to include non-traditional items, broadening the range of materials our patrons can utilize.

Goal #3 - Enriching Lives

- We will continue expanding our programming offerings to meet the needs and interests of a diverse range of visitors.
- We will strengthen our participation in community events and increase our collaboration with local schools and other organizations, working to make our library a center of the community.
